# **National Institute of Justice**

## **Forensic Science Research and Development Symposium**

## American Academy of Forensic Sciences 75<sup>th</sup> Annual Scientific Conference

The National Institute of Justice (NIJ) Forensic Science Research and Development (R&D) Symposium is an open meeting where attendees can learn about NIJ-funded research across a variety of forensic science areas. You can register to attend the Symposium in person or virtually; however, American Academy of Forensic Sciences (AAFS) conference registration is not necessary to attend. Feel free to stop by to listen to specific presentations and view posters or stay all day and learn about the diverse NIJ forensic science R&D portfolio.

More details and registration information can be found here: <u>http://ow.ly/Z9yc50LWOAb</u>.

#### Tentative Agenda – Tuesday, February 14, 2023

The podium presentations will take place from 8:30am ET to 5:00pm ET. A Q&A session for each presenter will directly follow their presentation.

Start Time (ET)	End Time (ET)	Session Title
8:30am	8:40am	Welcome and Opening Remarks Lucas Zarwell, Office of Investigative and Forensic Sciences, NIJ
Session I –	nd Pattern Evidence/Trace Evidence	
Moderated b	n Manager, Gregory Dutton	
8:40am	9:05am	Applying the NIST Footwear Impression Comparison System to Comparisons Involving Realistic Crime Scene Impressions Steve Lund, National Institute of Standards and Technology (NIST)
9:05am	9:30am	Novel Ambient Oxidation Trends in Fingerprint Aging Discovered by High- Resolution Mass Spectrometry <i>Andrew E. Paulson, Iowa State University</i>
9:30am	9:55am	Surface-Enhanced Raman Spectroscopy Enables Highly Accurate Identification of Different Brands, Types, and Colors of Hair Dyes Dmitry Kurouski, Texas A&M University
9:55am	10:20am	Application of Particle Correlated Raman Spectroscopy (PCRS) for the Forensic Examination of Soils Brooke W. Kammrath, University of New Haven
10:20am	10:35am	Break
	thropology and Forensic Pathology	
Moderated b	y NIJ Program	n Manager, Danielle McLeod-Henning
10:35am	11:00am	GIS Application for Building a Nationally Representative Forensic Taphonomy Database <i>Katherine Weisensee, Clemson University</i>
11:00am	11:25am	Germ-Line Transformation of Forensically Important Flies Amber MacInnis, Florida International University
11:25am	11:50am	Bone Trauma and Thermal Alteration of Human Remains

Giovanna M. Vidoli, University of Tennessee, Knoxville

Start Time (ET)	End Time (ET)	Session Title			
11:50am	12:15pm	Development of the Forensic Anthropology Skeletal Trauma (FAST) Database Angela L. Harden, The Ohio State University			
12:15pm	1:25pm	Lunch Break – On Your Own			
Session III -	- Seized Drug	s and Toxicology			
Moderated b	y NIJ Program	n Manager, Frances Scott			
1:25pm	1:50pm	Detectability of ∆10-THC's Chiral Analogs in Urine by Six Commercially Available Homogeneous Immunoassays <i>Carl E. Wolf, Virginia Commonwealth University</i>			
1:50pm	2:15pm	Assessment of the Contribution to Drug-Impaired Driving from Emerging and Undertested Drugs <i>Amanda L.A. Mohr, Center for Forensic Science Research and Education</i>			
2:15pm	2:40pm	A Molecular Networking Approach to Processing Untargeted High Resolution Mass Spectrometry Data in Forensic Toxicology <i>Heather Barkholtz, University of Wisconsin–Madison</i>			
2:40pm	3:05pm	High-Resolution Mass Spectrometry Screening in Forensic Toxicology: Cost Benefit Analysis Sarah Kerrigan, Sam Houston State University Jessica Ayala, Houston Forensic Science Center			
3:05pm	3:20pm	Break			
	- Forensic Bi	ology/DNA n Manager, Tracey Johnson			
2:20nm	2:45nm	Validation of a Confirmatory Proteomic Mass Spectrometry Body Fluid			

	3:20pm	3:45pm	Assay for Use in Publicly Funded Forensic Laboratories Erin Butler, New York City Office of the Chief Medical Examiner
	3:45pm	4:10pm	Biological Sample Analysis Using Prediction Modeling for Early Mixture Detection <i>Tracey Dawson Green, Virginia Commonwealth University</i>
	4:10pm	4:35pm	DNA Analysis Findings from Male Sexual Assault Victims: Multidisciplinary Practice Implications <i>Julie L. Valentine, Brigham Young University</i>
	4:35pm	5:00pm	Selectively Analyzing and Interpreting DNA from Multiple Donors with a Full Single-cell Strategy Nidhi Sheth, Rutgers University–Camden

## Adjourn

### **Poster Session**

The poster presentations will be from 5:00pm ET to 6:30pm ET. Self-guided tours will begin at 12:00pm ET and the poster room doors will remain open until 7:00pm ET. For those who wish to access the posters virtually, more information can be found here: <u>http://ow.ly/Z9yc50LWOAb</u>.

A Universal Method for the Detection of Organic and Inorganic Gunshot Residue Based on Fast Fluorescence Mapping and Raman Spectroscopic Identification Igor K. Lednev, University at Albany – State University of New York

Development of an Empirical Fingerprint Aging Model Using Fingerprints Analyzed with Laser Desorption/Ionization Mass Spectrometry Daphne R. Patten, Iowa State University

Revisiting the Set Value for the Minimum Drip Stain Size *Garam Lee, Boston University* 

Extraction and Quantification of Fentanyl and Metabolites from Complex Biological Matrices to Support Medicolegal Death Investigations Joseph Cox, Florida International University

Utilizing eDNA from Four Biological Taxa Associated with Geologic Evidence for Sample-to-Sample Comparisons and Study Site Separation *Teresa M. Tiedge, North Carolina State University* 

Analysis of Less Volatile Components in Ignitable Liquids by Direct Analysis in Real Time Mass Spectrometry and Versatile Sampling Strategy *Mengliang Zhang, Middle Tennessee State University* 

Development of an Interactive Database of Contemporary Material Properties for Computer Fire Modeling Mark B. McKinnon, Underwriters Laboratories Fire Safety Research Institute

Rapid Association of Commingled Remains by their Chemical Profile *Kristen M. Livingston, University of Central Florida* 

Personal Identification Using Part-to-Part Comparison of 3D Lumbar Geometry Using Antemortem and Postmortem Computed Tomography Summer J. Decker, University of South Florida Health & Tampa General Hospital

You Are What You Eat! Identification of the Matrices on Which Necrophagous Insects Feed Using Direct Analysis in Real Time–High Resolution Mass Spectrometry (DART–HRMS) and Chemometrics *Rabi A. Musah, University at Albany – State University of New York* 

Developing Subadult Sex Estimation Standards Using Adult Morphological Sex Traits and an Ontogenetic Approach Stephanie J. Cole, University of Nevada, Reno

An Osteometric Approach to Separating Commingled Pelvic and Foot Joints *Helen Litavec, Binghamton University* 

Combining Surface-enhanced Raman Spectroscopy (SERS) and Mass Spectrometry Techniques to Increase Sensitivity and Specificity in Toxicological Drug Analysis in Blood Plasma *Vitoria Simas, Indiana University–Purdue University Indianapolis* 

Getting into the Weeds—A Combined Ambient Mass Spectrometric and Chemometric Approach for Differentiating Hemp and Marijuana Varieties of Cannabis sativa *Rabi A. Musah, University at Albany – State University of New York* 

Tracking and Disseminating Data on Novel Psychoactive Substances (NPS) through NPS Discovery's Drug Early Warning System Alex J. Krotulski, Center for Forensic Science Research and Education

Biomarkers of Cannabis Exposure in Exhaled Breath Condensate and Oral Fluid Anthony P. DeCaprio, Florida International University

Validation of a LC-DAD Method with Optional ESI/TOFMS Detection for the Accurate Measurement of Δ9-THC and Δ9-THCA Among Twenty Cannabinoids in Cannabis *Liguo Song, Western Illinois University* 

Sample Homogenization, Extraction, and Clean Up Procedures at NIST for the Determination of Total Δ9-THC in Hemp-derived Finished Products *Walter Brent Wilson, National Institute of Standards and Technology (NIST)* 

Improved Nucleic Acid Recovery from Trace Samples Using Affinity Purification *Brian Davis, GE Research* 

Development of a Probe Capture Next-Generation Sequencing Assay for Analysis of the Mitochondrial Genome and Nuclear STR and SNP Markers *Gunmeet Kaur Bali, 10x Genomics* 

Single-cell Likelihood Ratios are Highly Informative and Robust Across Multifarious Mixture Complexities *Catherine M. Grgicak, Rutgers University–Camden* 

Adaptation, Optimization, and Validation of a Semi-automated DNase I-based Differential Extraction Procedure on the Beckman Coulter Biomek® NX<sup>P</sup> Automated Workstation Ashley M. Cooley | Virginia Department of Forensic Science

Paper-based Chemiresistive Biosensor Array for Rapid, On-site Identification of Multiple Body Fluids at a Crime Scene

Samriddha Dutta, University of California, Riverside

Sex-based Targeted Recovery of Cells in a Heterogeneous Mixture: Separating Male and Female Likecells

Amber C. W. Vandepoele, Syracuse University

A Fully Integrated Microfluidic Tool for Forensic Epigenetic Sample Preparation *Rachelle Turiello, University of Virginia* 

Quality Control Procedures Required for the Generation of Forensic Quality Mitogenome Reference Data

Charla Marshall, Armed Forces Medical Examiner System – Armed Forces DNA Identification Laboratory (AFMES-AFDIL)/SNA International
